Subject: Job recommendation letter for Ms. Julia Foley

It is my pleasure to write this letter of support for Ms. Julia Foley as she embarks on her job search.

I met Ms. Foley in my INFO 3401: Information Exploration and INFO 2301: Quantitative Reasoning courses during the Fall of 2022. She performed exceptionally well and earned an A in both courses. I believe Ms. Foley has the skillset, curiosity and the drive to do well in jobs related to Information Science, Data Science/Analytics and Computer Science.

Although Ms. Foley has done very well in all areas of her course work, the best example of her promise is indicated by the project, in which she performed Hypothesis Testing to infer that the data from Cleveland's Mayo Clinic data support the hypothesis that smoking is correlated to coronary heart disease.

With her considerable experience as a Congressional Intern in the United States House of Representatives and Legislative Council President at the University of Colorado, Ms. Foley will be an asset to any organization. Ms. Foley continues to impress me with her knowledge and dedication to her work. You will find her to be a highly motivated, competent and committed employee and a successful future professional and community leader. In closing, I recommend Ms. Foley for a job in your organization without reservation.

Sincerely,

Shahzad (shah) Bhatti
